About

I'm a passionate UI/UX Designer,

currently working at **Triveni Global Software Services.**

Hi, I'm **Hardik**, A Self-Taught And Dedicated UI/UX Designer With **3.1+** Years Of Experience In Crafting Seamless Digital Experiences. With A Strong Foundation In User-Centered Design Principles, I Specialize In Creating Interfaces That Are Not Only Visually Engaging But Also Intuitive And Accessible To A Diverse Audience. Currently Working As A UI / UX Designer At Triveni Global Software Services, I Focus On Designing User-Friendly, Aesthetically Appealing, And High-Performing Interfaces.

Skills & Expertise

Frontend Technologies: HTML, HTML5, CSS, CSS3, Sass, jQuery
Frameworks & Libraries: Bootstrap, Tailwind CSS, React Material UI, Angular Material UI
Design Tools: Figma, Adobe XD, Illustrator, Photoshop

I am dedicated to creating high-quality, user-centric designs that enhance user experience and meet business goals. Always eager to learn and adapt, I stay updated with the latest UI/UX trends and technologies.

Experience

- **JR IT Teach Bloom** **Jun 2021 – Apr 2022**
(Internship to Project-Based Role)
 - Gained hands-on experience in UI/UX design by converting mockups into responsive web pages using HTML, CSS, and Bootstrap
 - Designed wireframes and mockups using Adobe XD and Photoshop, focusing on clean, user-friendly layouts
 - Converted JPG designs into structured HTML with well-organized styling for seamless user experience
 - Applied UI principles including layout, typography, and color theory to improve design consistency
 - Iterated designs based on team feedback and usability improvements
- **Triveni global software services** **2022 - May – present**
 - At Triveni Global Software Services, I played a key role in designing user interfaces for enterprise-grade applications. I collaborated closely with development teams to create visually appealing, consistent, and user-friendly UIs using Figma, while ensuring seamless integration with React (MUI, Fuse Theme) and Angular (Angular Material) platforms.

Key Responsibilities

- **User Interface Design**
 - Created high-fidelity mockups, interactive prototypes, and scalable design systems using Figma.
 - Delivered clean, intuitive, and user-centric designs aligned with business goals.
 - Provided detailed design specifications and assets for Angular applications.
 - Refactored legacy designs to improve maintainability and modern UX standards.
- **Cross-Functional Team Collaboration:**
 - Participated in Agile/Scrum meetings.
 - Worked closely with product managers, developers, and QA teams to align on design goals and delivery.

Key Responsibilities

● Experience with React, MUI, and Fuse Theme:

- Designed custom MUI components and utilized the MUI theme system.
- Customized the Fuse theme to align with brand guidelines and project requirements.
- Implemented responsive design strategies using MUI's Grid system.
- Developed comprehensive design documentation to streamline development processes.

● Cross-Functional Team Collaboration

- Participated in Agile/Scrum meetings.
- Coordinated with project managers, developers, and stakeholders.

● Responsive Design & Testing

- Ensured responsiveness across devices and breakpoints using best practices.
- Conducted cross-device testing to refine the mobile and tablet experiences.

Challenges & Solutions

● Maintaining Design Consistency Across Angular and React

- Challenge: Ensuring uniform design across Angular Material and MUI was crucial.

Solution:

- Established a design system in Figma, defining typography, spacing, and component behavior.
- Created a shared UI component library to maintain consistency across Angular and React.
- Standardized design tokens and themes to reduce UI discrepancies.

● Ensuring Code Consistency Across Teams

- Challenge: Multiple teams worked on different modules, leading to inconsistent UI implementation.

Solution:

- Developed UI Component Documentation for standard usage guidelines.
- Implemented code consistency practices to maintain uniform styling.
- Regular design reviews to ensure UI adherence across teams.

Impact & Results

● Maintaining Design Consistency Across Angular and React

- Improved UI/UX Consistency: Standardized design across Angular and React, enhancing usability.
- Faster Development: Shared design system reduced UI development time.
- Code Maintainability: Standardized guidelines helped developers maintain and extend the UI easily.

React Project Experience with MUI & Fuse Theme

- Designed and implemented custom UI components using Material-UI (MUI), adhering to design standards and accessibility best practices.
- Customized the Fuse Theme, including color palettes, typography, layout structures, and iconography to match branding requirements.
- Created and maintained a scalable design system and component library using React + MUI + Fuse, ensuring consistency and reusability across the application.
- Implemented responsive layouts using MUI's Grid system and responsive utilities, optimizing UX across mobile, tablet, and desktop devices.
- Built custom icons as per client requirements, integrating them seamlessly with existing UI frameworks.
- Authored a global design documentation and checklist, outlining reusable patterns, spacing, typography, and component usage for all team members.
- Utilized SASS/SCSS for writing scalable, maintainable styles integrated into MUI theming.
- Created comprehensive design documentation to guide developers and QA teams in implementing UI precisely.
- Conducted design reviews and maintained UI QA standards to ensure adherence to the design system.
